

2016 Website Report

The RMLL Executive ratified the SportzSoft quote for the licensing and continue use of the following SportzSoft products for the 2016 Season:

SportzSoft Admin – overall management of players and bench personnel;
SportzSoft Team Standings/Team Stats – online management of team rosters, player stats and team standings as well as team administration access to teams for Franchise Certificates, rosters, team announcements, events and scheduling input;

SportzSoft Scheduler – input of time slots and development of Division schedules;

SportzSoft Publisher – maintenance of the RMLL website.

Current Functionality Not Fully Utilized:

- Goalie Stats
- Player Roster Photos

Player Stats:

Player stats are entered into the RMLL system with the manual entry of the game sheet. Player stats are not “real time” but everyone wants them in “real time”. For the 2017 Season we will be changing our process. Teams will be able to use one of two options:

- The Team Manager can enter the info from the game sheet within 24 hours of the game being played; or
- The home team can use an electronic game sheet

New functionality Implemented in 2016:

Teams can now specify what their Twitter, Facebook and Instagram linkages are on their Team Home Page.

Amanda Thielen continued her role as the RMLL Webmaster and support help to the RMLL teams.

For the 2017 Season the RMLL Home Page will be given a facelift. We will continue to refine and enhance our website with new functionality throughout the 2017 Season.

Christine Thielen
Executive Director, RMLL
