

2017 Website Report

The RMLL continues to use the SportzSoft modules for the RML System and the RMLL website.

SportzSoft Admin – overall management of players and bench personnel;
SportzSoft Team Standings/Team Stats – online management of team rosters, player stats and team standings as well as team administration access to teams for Franchise Certificates, rosters, team announcements, events and scheduling input;

SportzSoft Scheduler – input of time slots and development of Division schedules;

SportzSoft Publisher – maintenance of the RMLL website.

Player Stats:

This Season all teams entered their home game stats directly into the RMLL System. Jr. A and Tier I teams used the new Live Game Sheet (Game Sheet App) which runs on an iPad or an Android Tablet. The teams in Sr. B, Sr. C, Tier II, Tier III, Jr. and Sr. Ladies all entered their information from their home game sheets into the system after their games. This resulted in stats being posted sooner to the website.

Amanda Thielen continued her role as the RMLL Webmaster and support help to the RMLL teams.

Using SportzSoft modules, we will continue to refine and enhance our website with new functionality throughout the 2018 Season.

Christine Thielen
Executive Director, RMLL
