

## 2018 Website Report

The RMLL continues to use the SportzSoft modules for the RML System and the RMLL website.

**SportzSoft Admin** – overall management of players and bench personnel;  
**SportzSoft Team Standings/Team Stats** – online management of team rosters, player stats and team standings as well as team administration access to teams for Franchise Certificates, rosters, team announcements, events and scheduling input;

**SportzSoft Scheduler** – input of time slots and development of Division schedules;

**SportzSoft Publisher** – maintenance of the RMLL website;

**SportzSoft Game Scoring App** – allows real time entry of game sheet stats;

**SportzSoft LiveLeague Phone App** - for iPhone and Android Phones.

Allows users to quickly find scheduled games and follow live scores and stats for those games as well as viewing the scores and stats from past games.

### **Player Stats:**

This Season all teams continued to enter their home game stats directly into the RMLL System. Jr. A and Tier I teams used the Live Game Sheet (Game Sheet App) which runs on an iPad or an Android Tablet. The teams in Sr. B, Sr. C, Tier II, Tier III, Jr. and Sr. Ladies continued to all enter their information from their home game sheets into the system after their games. Although stats are being received sooner, there is still a backlog verifying the info. For 2019 we will look to changing the process where stats are posted as received and then verified.

### **Website:**

For the 2019 Season we are looking to give our website a facelift.

Amanda Thielen continued her role as the RMLL Webmaster and support help to the RMLL teams.

We will continue using SportzSoft modules and will continue to refine and enhance our website with new functionality throughout the 2019 Season.

Christine Thielen  
Executive Director, RMLL
