

SportzSoft Tournament

Organize and host great tournaments with the SportzSoft Tournament module. The SportzSoft Tournament module is an integrated tournament management system for team sports. The system allows tournament organizers to:

- Process team registrations
- Manage tournament operations and game schedules
- Manage tournament volunteers
- Present Live scoring and results

Registration Management

Tournament registration management has never been easier. Our tournament registration process is an easy way to administer club registrations for your tournament, no matter what the size. Teams sign up online and can pay all fees online or by cheque. Tournament administrators can control who signs up and administer all payments and communications.

- Online registration for teams makes it easy to manage registrations by eliminating duplication or transposition errors.
- Manage all fees by division. You can set different fees for different divisions.
- Set maximum team registrations by division.
- Deposit feature allows you to process team 'requests' to enter tournament and pay a deposit. You can then 'approve' the teams you want and request full payment.
- Accept online credit card payments or cheques
- Accept partial payments or add in any required 'adjustments' to a team's fees
- Built-in email communications makes it easy to keep teams up to date
- Registration summary provides quick overview of team registrations by registration status and payment status
- Team listing by division allows you to quickly see which teams are registered for each division
- Registered teams can enter their team and bench rosters in their team portal

Volunteer Management

- Powerful Volunteer Management module to allow host club members to sign up and help out at the tournament
- Tournament administrators can setup their own custom volunteer activities and shifts
- Volunteers can create a login account and sign up for volunteer activities themselves
- Volunteer reports show who has volunteered and what shifts need to be filled

Tournament Management

Quickly develop your schedule, or import one into the tournament. As game results come in, standings are automatically calculated, and you can quickly update the teams who have made it to the medal rounds.

- Tournament schedule is broken down by division showing schedule, teams, facilities (with directions and maps) and standings.
- Schedules can be further refined with 'standing categories' such as round robin games, pools, semi finals and playoffs; you can customize to suit your needs
- Games scores can be quickly updated using the Live Scoring feature
- Tie break rules automatically apply as scores are entered and standings adjusted accordingly
- Teams can easily see when their next game is reducing the amount of time you spend updating team managers by phone or text

Scoring and Results

All scores entered into the system displays standings and scoring results in real time on the website and the tournament mobile app.

- Live scoring is quick and easy
- Automatic updating of team standings
- Make use of our **Live GameSheet** app to enter live scores and stats
- Display scores on monitors, website or through tournament mobile app in real time
